

Tabletop RPG Sheet Manager App

The Idea behind this app is to make creating and managing sheets for tabletop games easier. The user will be able to create their tabletop characters in the app, store each filled out character sheet in a folder within the app, and upload each character sheet to the iCloud. Users will also be able to use simulated dice within the app via a pop-up shortcut, making creating characters and playing tabletop RPG games easier. This app is essential for people who want to play tabletop RPG's, but have no way to procure an actual character sheet to use.
